Ergomax motors are .45 HP with a wide torque curve for easy drilling operations.

A quiet rear exhaust that meets euro specifications.

A special textured throttle lever for a great feel and easy control.

Anti-vibration handle glove made from a unique PVC vinyl closed-cell foam of unequaled durability and comfort.

Non-absorbant, dirt and oils can easily be washed away.

This handle glove is unaffected by most solvents and chemicals and is highly UV resistant.

Our ergonomic swivel air inlet allows access to smaller spaces and eases wrist strain.

All Ergomax motors will be available in straight or offset versions for drilling or installation operations.
